PROFESSIONAL SUMMARY

If you need it done, I'll figure it out. At Queens, I dove into the docs for our CRM – Slate – and quickly became a reliable data steward, as well as someone who pushes the capabilities of the tool. I learned in this time to translate business needs into technical requirements and technical limitations back to stakeholders to ensure my team and I stay focused on the right work. To continue building technical expertise and formalize skills I had begun teaching myself I enrolled in a Software Engineering Certificate. I've spent my career optimizing a funnel — acquisition through enrollment — and I'm technical enough to turn that data into the right thing to build next, working with engineers rather than handing it off.

CORE COMPETENCIES & TECHNICAL SKILLS

Admissions Marketing Strategy: Integrated campaign development, lifecycle messaging, audience segmentation, enrollment funnel strategy, student-centered communications design

Enrollment Analytics & Reporting: Funnel analytics, dashboard design, data-informed communications optimization, SQL, Excel, Power BI, Tableau

Slate & Enrollment CRM: Slate (lifecycle communications, campaign sequencing, query writing, workflow automation, data integrity), Jenzabar, PowerFAIDs

Software: HTML/CSS, Liquid Markup, Python (Flask), JavaScript, Node.js, React, Bootstrap, PicoCSS, PostgreSQL, Git/GitHub

Leadership & Collaboration: Staff supervision, cross-unit coordination, project planning, stakeholder management, Agile/Scrum, Jira, Microsoft Planner

PROFESSIONAL EXPERIENCE

Facilities Technician | YMCA of the Inland Northwest *Jun 2025 – Present*

- Independently scope and execute maintenance projects at the South branch
- Also work with CEO as the Software Development Project Manager, assisting with Monday.com configurations and programming projects

Assistant Director, Enrollment Operations | Queens University of Charlotte *Jan 2021 – Jul 2024*

- Maintained data pipelines between Admissions, Student Financial Services, the Registrar's Office and Institutional Research
- Created and maintained executive level reports for the President and VPs to track the admissions funnel
- Led yearly 'cycle-prep', preparing Applications, Events, Forms, and Portals for the next recruitment class
- Collaborated with marketing to deliver timely, informative recruitment messaging to prospective students and their families

Admissions Operations Analyst | Queens University of Charlotte *Jul 2018 – Dec 2020*

- Created first custom application portal to dynamically display relevant information to prospective students
- Overhauled Nursing School application, eliminating the need for 2 separate applications. This improved the completed application rate and simplified the review process. Our team was able to fill the nursing program and begin holding a waitlist of admitted students.
- Created an on-demand year to date year-over-year funnel report

Admissions Counselor | Queens University of Charlotte *Jun 2017 – Jun 2018*

EDUCATION

Software Engineering Certificate — Gonzaga University	2025
Master of Business Administration (MBA) — Queens University of Charlotte	2020
Bachelor of Arts in Communication — Queens University of Charlotte	2017

PROJECTS

GET A JOB! — A job search tool I've built as a Flask App. Users create job searches, save job posts to their profile to apply to. AI is integrated to provide user feedback on job match as well as optimize job search. [\[https://get-a-job-fg15.onrender.com/\]](https://get-a-job-fg15.onrender.com/) | [\[https://github.com/natesmith21/auto_job_search\]](https://github.com/natesmith21/auto_job_search)

Who's Hungry? — My final project in my certificate. This simple app connects to the SpoonacularAPI to allow users to search for recipes or browse by cuisine type. [\[https://github.com/natesmith21/whos-hungry\]](https://github.com/natesmith21/whos-hungry)
